## Powered Decoy Systems

### Pinewood Advantage

Pinewood's Advantage sets the standard for rotary decoy systems. Manufactured to the highest standards, the advantage combines a robust and powerful motor with components engineered to give unrivalled reliability. The Advantage is finished in matt green and comes complete with a hard wearing purpose made carry bag. The advantage operates at a single life like speed with an 8ft turning circle.

Advantage Pro - weight 6¼ lbs

### Pinewood Advantage Pro

The Advantage Pro takes rotary systems to a new level. Building on the success and track record of the Advantage, the Advantage Pro features a variable speed control so the shooter can tailor the speed of decoy presentation to the conditions of the day. Both versions utilize a cork screw spike to maximise stability in hard ground or windy conditions and take both the Pinewood flocked winged decoy or dead birds.

Standard rotary - weight 5½ lbs

Rotaries and Flapper

Pinewood Sporting offer a repair and reconditioning service plus the option of exchange units to upgrade your existing equipment. Please ask for details of these services.

**ALL THESE PRODUCTS ARE COVERED BY OUR 12 MONTH GUARANTEE**

## Powered Decoy Systems

Optional tripod

### Optional Tripod

Both the advantage and advantage pro utilize a cork screw main spike a three pronged tripod can be fitted to give additional stability in hard ground or windy conditions.

Battery bag and charger kit

### Pinewood Flapper

The pinewood flapper simulates a bird landing or taking off and brings a well established technique up to date. While most shooters will be familiar with manual ways of getting a dead bird to flap, the Pinewood flapper uses battery powered arms to give day-long hands off movement leaving the shooter free to concentrate on the important part of the day - shooting pigeons.

Advantage

### Battery Bag and Charger Kit

The power behind the pinewood range. Available as 12V 7 or 17 Amp, these batteries charge quickly and store sufficient power for even the longest day in the field. The batteries work with all of Pinewood's powered products and have a heavy duty carry bag with a charger and connecting leads.

## Products: Hide Poles

Pinewood's range of hide poles set the standard for hide building.

Made from durable, lightweight aluminum and with a range of adjustment options they form a superb frame for making net hides in any situation. All the poles are matt finished in camouflage with a solid point and tough kicker plate to ensure you can get them into even the hardest ground.

A unique feature is the Pinewood slide action adjustable joint. With a hard wearing internal nylon bush, height adjustment is a simple case of pulling up or pushing down.

Pinewood poles are all finished with a deep slotted 'V' top to give plenty of room to hang and wrap hide nets.

For extra security to hide structure Pinewood telescopic hide supports are ideal. They clip securely onto the hide poles to provide a degree of rigidity that will withstand the roughest weather conditions

### Specifications:

#### Compact Poles

Ideal for wildfowling or for making hides where you stand below ground level.  
36" closed - 72" fully extended.

#### Standard Poles

The bench mark for most shooting situations.  
47" closed - 76" fully extended

#### XL Poles

Perfect for tall shooters or for adding a roof to a hide.  
54" closed - 79" fully extended

## Pinewood Floaters

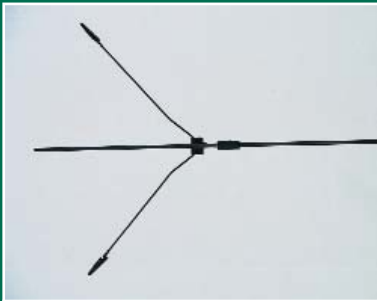

Pinewood Floaters

*"Pinewood's greatest addition to the pigeon shooting world"*

- John Batley

*"Superb bit of kit"*

- Sporting Gun

Pinewood Floater

Pinewood floaters are simple but devastatingly effective. Engineered from steel and fiberglass to combine flexibility with excellent presentation, this piece of equipment should feature in every pigeon shooter's kit.

The floaters come in a range of lengths and can be used with either a dead bird or a winged full bodied decoy to provide that all important impression of movement to the pattern as a bird comes in to land.

Floater Foot

Telescopic floaters allow different levels of movement or bounce according to the extension used and the strength of the wind.

Floater with Winged Full Body

Open Winged Angel

## Decoys

Pinewood has developed its range of decoys through years of research and field testing by shooters in all weathers and in a wide range of crops. While plastic decoys have always been favoured for their light weight, in the past they were liable to glint in the sun, particularly after rain.

Now though, Pinewood has perfected a durable and **realistic high density flocked coating** for decoys that makes glinting a thing of the past. This range of superbly detailed decoys in shells and full bodies has been developed to cover not only pigeons but corvids such as crows that are increasingly being targeted by shooters.

### Pinewood Shell Decoy

The classic flocked shell pigeon decoy features high vis white marking and sprung mounting sticks to maximize presentation and movement. The decoy can be mounted in two places to maximize presentation and movement.

Pinewood shell decoy

Pinewood full body decoy

### Pinewood Full Body Decoy

The full body shell decoy comes complete with a sprung stick to keep it moving in even the lightest wind. Also fits onto lofting pole units.

### Pinewood Full Bodied Winged Decoy

Pinewood also produces a full body flocked decoy that takes compatible wings. It fits on our range of advantage systems as well as our telescopic floaters and also has superb high visibility markings.

Pinewood full bodied winged decoy

### Pinewood Crow Decoys

As shooting crows over decoys becomes more popular, these realistic stand up crow decoys in flocked black will lead the way.

Winding the spring up and down the plastic mount on the stick changes the resistance allowing the shooter to tailor the amount of movement he wants from his pattern in response to the strength of the wind.

## Cradles and Mounts

Rocking Cradles

In tall crops it is essential to present your decoys to maximize their visibility. The white bars on pigeon's wings and necks are a key flock recognition symbol and must be seen by passing birds if you are to pull them in. Pinewood cradles and mounts do exactly that.

### Bobbing Cradle

This compact bobbin cradle raises a dead above the ground or standing crop. The specially designed rod and cradle allows the bird to rock up and down in the slightest breeze.

Rocking Cradles

### Static Cradles

At 23" high these hard wearing cradles are finished in matt green and will allow you to present a dead bird above even the highest crop. Wings may be held in against the body or allowed to drop outside the frame to expose the wing bar markings.

Pinewood Static Cradles

### Rocking Cradles

Movement in a pattern is key so these cradles in 16" and 23" versions for dead birds or winged decoys combine great fixing with an adjustable and flexible pole.

### Wing Mount

This simple mount spreads the wings of dead birds and is compatible with the entire Pinewood range

Rocking Cradle with Wings

### Tail Mount

A pigeon coming in to land always puts on the air brakes by spreading its tail feathers. This small mount allows you to mimic that precisely and also fits the Pinewood range.

### Pinewood Flapper

This simple manual lightweight flapper is great for giving an extra dimension of movement to the pattern. Mounted on the integral spike and with wings clipped securely to the flexible arms, a few pulls on the line attached will make the raise and lower the bird's wings to show off those white bars to the maximum.

Pinewood Flapper

## Products: Accessories

### Pinewood Neck Props

These tough moulded PVC props are perfectly designed to hold the dead bird's head up to show off the white neck bars.

Pinewood Neck Props

### Pinewood Gun Rests

Designed to hold both over and under and side-by-side guns these holders clip securely onto all Pinewood hide poles to give extra safety in the hide.

Pinewood Gun Rests

### Pinewood Spring Sticks

In shell and full body decoy compatible versions, these spring loaded sticks come in 9", 18" and 30" lengths and adjust to account for different wind conditions.

### Tee Seat

A new take on the classic shooting stick this superbly designed seat weighs just a few ounces, will take the weight an 18st man and folds flat for easy carrying.

### Face Mask

A crucial part of the shooter's camouflage particularly when the sun is out, these lightweight face masks are comfortable to wear all day.

Face Mask

### Pinewood Cup Holder

It clips to all Pinewood hide poles and we promise you'll never kick over another cup of tea as a bird comes into the pattern by surprise.

Pinewood Cup Holder

Spring Sticks

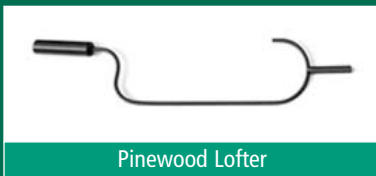

## Pinewood Lofting Solutions

Pinewood Lofting Poles

### Pinewood Lofting Poles

Pinewood's lightweight aluminium lofting poles are made from in 5x5ft sections. Locking together with spring loaded joints and finished in matt green and black camouflage, the poles are machined to fit the loftier and branch head to get decoys up in branches where they can be really seen by pigeons.

Pinewood Loftier

### Pinewood Loftier

A full bodied decoy is placed onto the plug at the top of the loftier. The lofting poles position the bird while the counter weight keeps it perfectly balanced and swaying gently in the trees.

Pinewood Branch Head

### Pinewood Branch Head

The branch head fits securely onto the top lofting pole to be held in place. The mounts for the full bodied decoys are sprung to allow them to move realistically in the wind.

## Sporting Scene Pigeon Shooting Videos and DVDs

Sporting Scene is the UK's leading producer of field sports films with an unrivalled reputation for quality and content. These films are available in both VHS and DVD formats and cover every aspect of pigeon shooting from a beginner's guide to equipment and field craft to comprehensive coverage of all the major crops and conditions the shooter will encounter through out the year. All the films feature a range of Pinewood products in action and give full advice on tactics and set ups to make the most of a days sporting pigeon shooting.

**The films are presented by Pinewood's David Westwood with renowned pigeon shot Peter Theobald.**

### **Sporting pigeon shooting - Introduction (105 mins)**

This programme gives a comprehensive overview of the equipment and tactics that will give you the best chance of success in the range of situations that the sport can present. For newcomers to the sport, as well as those shooters looking for hints and tips that will give them an edge in field, this programme will be an invaluable reference to come back to time and time again.

### **Sporting pigeon shooting - Summer (90 mins)**

From spring oil seed rape, through laid cereals, harvest stubbles and winter drillings, the months of summer offer the pigeon shooter a huge variety of challenges and opportunities. This programme covers all the key crops and conditions that the pigeon shooter will encounter as the season develops from spring to summer and autumn.

### **Sporting pigeon shooting - Winter (90 mins)**

This programme tackles a range of winter situations centred on the mainstay of the pigeon shooters sport - oil seed rape. With a truly comprehensive and illustrated range of tips and techniques to tackle the crop and the problems it can give, the programme also covers the opportunities that early drilled cereals present as winter turns to spring.

### **Pigeon shooting**

The entire pigeon shooting year is covered in this latest programme from Sporting Scene. Following the cropping patterns as the agricultural calendar unfolds, a selection of the most important and common shooting scenarios are shown with full guidance and background on what to do and how best to ensure you put a few birds in the bag.
